Recall before you open the file

Trygve Finkelsen · Pexels License · Full source/licence in Sources; displayed without alteration. · Sources and licences

Name a concept versus a treatment. Explain a palette role. Distinguish a mood board from a layout.

A useful decision record

Original rendered graphic/typographic teaching model. Separate practice brief; not a native Photoshop capture or assessed client solution. · Sources and licences

Intent → choice/control → visible evidence → reason.

Recoverable production

Mericaktar · CC BY-SA 4.0 · Full source/licence in Sources; displayed without alteration. · Sources and licences

Keep sources, editable text, meaningful masks and purposeful adjustments.

Check the evidence

Dietmar Rabich · CC BY-SA 4.0 · Full source/licence in Sources; displayed without alteration. · Sources and licences

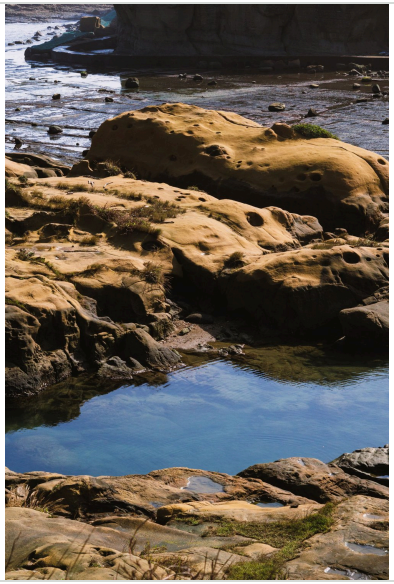

Evidence must let you locate and inspect the decision.

CHECKPOINT · TRY BEFORE CHECKING

Which decision entry is useful?

- I used Photoshop for a long time.
- Title layer: changed tracking from 0 to 30; compare title-before/title-after and explain the effect.
- I like my result.

Two views, one purpose

CX LEE · Pexels License · Full source/licence in Sources; displayed without alteration. · Sources and licences

Reflow the screen version. Check the first reading again.

Actual viewer responses

PattayaPatrol · CC BY-SA 4.0 · Full source/licence in Sources; displayed without alteration. · Sources and licences

Show the work at the intended size. Ask what was noticed first and what message was understood.

Revision with a reason

cogdogblog · CC BY 2.0 · Full source/licence in Sources; displayed without alteration. · Sources and licences

Find the mismatch. Change one relevant relationship. Check the new version.

Check the test

Armchair · CC BY-SA 3.0 · Full source/licence in Sources; displayed without alteration. · Sources and licences

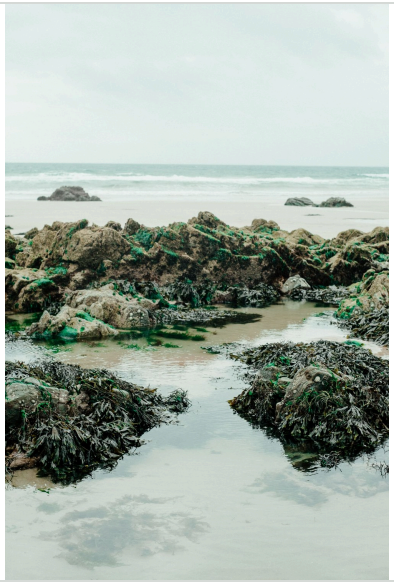

A claim about an audience needs evidence and a limit.

CHECKPOINT · TRY BEFORE CHECKING

Two viewers read the date before the activity. What should the designer do?

- Report that every viewer will fail.
- Keep their actual responses, predict a relevant hierarchy change and test the revision.
- Replace their responses with the intended message.

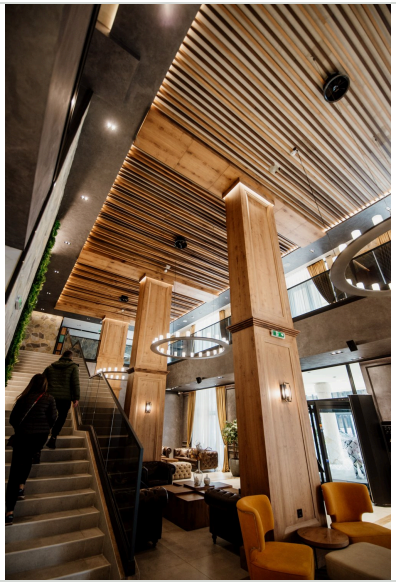

Sources and AI use

Harry Cooke · Pexels License · Full source/licence in Sources; displayed without alteration. · Sources and licences

Record creator, source, licence, modifications and the extent of assistance.

A short defence

Shixart1985 · CC BY 2.0 · Full source/licence in Sources; displayed without alteration. · Sources and licences

Point to work. Explain effect, evidence, trade-off and a changed condition.

PAUSE · YOUR TURN

With a partner, 3 minutes each: point to one decision, explain its visible effect and a rejected alternative. Partner asks “What would change on a phone?” Then write your own concise correction. Success: the explanation uses actual file evidence.

The handoff

cottonbro studio · Pexels License · Full source/licence in Sources; displayed without alteration. · Sources and licences

Reopen PSDs and PNGs. Check dimensions, editable sources and private teacher access.

Feedback and revisit

Glory Cycles · CC BY 2.0 · Full source/licence in Sources; displayed without alteration. · Sources and licences

Use the teacher’s specific next action on a new version.

CHECKPOINT · TRY BEFORE CHECKING

IE on recoverable technique means…

- The student has Beginning achievement.
- There is not enough evidence; locate or demonstrate the relevant source control.
- The student worked too slowly.
